Additional message: The removal of the product failed @AVGMSI\_Error27046 Driver installation failed (0xE0010057)  
Context: Uninstallation of AVG, MSI action failed Go online to learn more about this issue.. AVG announces error code 0xC0070643 Firewall is inactive, not working or in error state.

var q = 'avg%20firewall%20driver%20error'; The AVG Firewall confirmation dialogue is displayed when you need to decide whether you wish to allow or block network communication for certain application.. You may try to upgrade your AVG Free Antivirus only to find out that a critical error stops the installation.. My advice uninstall AVG and turn on Windows Defender and firewall Recently, I installed AVG 2013 (we've reviewed it here, you may want to read) and started using it, today, when I tried to uninstall it from the Control Panel, I got "driver installation failed, setup error".

Update: You can get this error when AVG installation fails also, I experienced this with AVG Internet Security 2015, I followed the instructions below and installed AIS 2015 again on my computer successfully without any issues.. Here is what error dialog says Driver installation failed Severity: Error Error code: 0xC0070643 Error message: General internal error.. 3 Allow AVG remover to run on startup which removes the other leftover entries.. AVG doesn't always play nice with Windows 8 and can cause this problem as well as others.. I've used AVG antivirus in the past, but never got this error before It is always good to investigate the reasons for getting this error, but the installation log saved hasn't helped much, let us take a look how to fix this.
